www.climate technologies.com

Climate Technologies Corporation is a 47 year old Michigan based company providing industrial and commercial process systems with a focus on temperature and humidity control, air pollution control & abatement, specialty environments, energy recovery and environmental certifications.

Climate Technologies works with you every step of the way to understand your true needs and challenges; develop the right system concept that balances low capital and lifetime operational costs; select, optimize and procure equipment; create an integrated and turn-key package; assist in the installation, startup, commissioning and environmental certification process. Once commissioned, we can provide on-going maintenance, parts and service.

Whether you wish to purchase a single piece of equipment or are looking for a turn-key solution involving system integration, design services, project management, and/or environmental certifications, Climate Technologies would like to be your partner. Project funding and leasing are available, or we can provide shared savings performance contract options to meet a wide variety of your needs.

CAPABILITIES

TEMPERATURE CONTROL - HUMIDITY CONTROL - SPECIALTY ENVIRONMENTS
AIR POLLUTION CONTROL - ENERGY SYSTEMS - ENVIRONMENTAL CERTIFICATIONS
TURN-KEY DESIGN & BUILD

APPLICATIONS

TEST CELLS - ENVIRONMENTAL CHAMBERS
FUMES-TO-FUEL VOC ABATEMENT & CHP POWER GENERATION CLEAN ROOMS
MECHANICAL ROOMS - HEAT RECOVERY SYSTEMS
