

CLIMATE TECHNOLOGIES CORP

150 N. 1st Street, Suite 100 □ Brighton, MI 48116 □ (248) 477-2020

<https://climatetechnologies.com>

For over 50 years, Climate Technologies Corporation (CTC) is a solutions-based manufacturer's representative with a focus on temperature and humidity control, air pollution control and abatement, specialty environments, energy recovery, and environmental certifications. CTC represents the best-in-class manufacturers in the world. With several professional engineers on staff, CTC works with our customers every step of the way to understand their true needs and challenges; develop the right system concept that balances low capital and lifetime operational costs; select, optimize, and procure equipment.

Proudly Representing Industry Leading Manufacturers:

- Global Leader in Climate Solutions for Mission-Critical Industrial Processes and Systems
- Industrial Grade Desiccant Dehumidification Equipment for Low Dewpoint and Ultra-Low Dewpoint Applications

- Industrial Grade Fans and Ventilators
- Direct Fired Air Makeup Units
- AMCA Certified Fan Testing Services

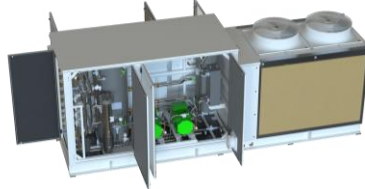

- Custom, Factory-Built Modular Utility Plants
- Turn-key Skid-Mounted HVAC Systems
- In-House Design and Manufacturing expertise, optimized for broad spectrum of customer needs

- Industrial chillers, compressor packages, heat exchangers, controls
- Low temperature applications down to -60F
- Aftermarket solutions, replacement parts and service

MSM CARNOT

- Sustainable, natural refrigeration solutions
- Packaged Transcritical CO2 and Ammonia refrigeration systems
- Chillers, condensing units, heat recovery systems and controls
- Industrial, Commercial, Recreational, Data Center applications

- Air and Water-Cooled Chillers up to 1,200+ tons
- Magnetic Bearing Turbocor Compressor Options
- Environmentally Friendly Low GWP Refrigerants

- Semi-custom, Modular Air Handling Units
- Capacities range from 800 to 90,000 CFM
- Fixed Plate HX and Energy Recovery Wheels
- Air Curtains and Hydronic Unit Heaters

- Flexible, fully custom HVAC systems
- Industrial air handling units for automotive and paint applications
- Full, in-house control systems and manufactured pipe chases

- Fully custom air handling units
- Factory designed, built, and tested to customer specifications
- Field installation supervision, startup, and testing services

DCA DEHUMIDIFIER
CORPORATION
OF AMERICA

- Industrial / Commercial Refrigeration Dehumidifiers
- Pool Dehumidification Units from 1.5 – 30 tons
- Horizontal and Vertical Configurations
- Control Systems, Remote Condensers, Heaters

ANGUIL™

- Industrial Pollution Control & VOC Abatement
- Concentrators and Heat Recovery Systems

Vent Products Co. Inc.

- Full line of standard and custom designed louvers, dampers, and roof products
- Stationary / Adjustable louvers, combination louvers / dampers, backdraft dampers, air control dampers, dynamic/static fire dampers

POLYGON

- Cost effective equipment rental solutions for Industrial and Commercial HVAC equipment
- Dehumidifiers, Chillers, Boilers, Fans, and Heaters
- Turn-key Engineered Solutions for each application
